Questions I have About God and the Bible:  
Does God Exist

## MY STORY

1. What is the strangest (to you) religion you have ever encountered?
2. If you could travel this summer, with money being no object, where would you go ?
3. It's prom weekend, so did you go to prom? What are your memories of your senior year?

**QUICK REVIEW:** What insight, principle or observation from this week's message did you find to be most helpful, eye-opening or troubling? Explain.

## DIGGING DEEPER

1. On Sunday, Pastor Phil said that both believing in God and not believing in God require faith. Do you agree with that? Agnostics and atheists would be offended by that, how would you explain that statement to them?
2. We talked about some of the evidence of God outside of the Bible. What convinces you about the existence of God? What are other examples of an intelligent designer of the universe?

3. Muhammed Ali once said, "I am the greatest" yet appeared so weak before his death from Parkinson's complications. Why would God makes us with bodies that wear out? Everything that we observe tends towards decay (falling apart). Why would God design it so that it needs to be fixed? What biblical principles are in play here?
  
4. Pr Phil stated that without God there is no hope. Have you found this to be true? One of the most painful parts of Hell is an eternity without God which is described as weeping and gnashing of teeth—hopelessness. Heaven is described as being in the presence of God—Hope!
  
5. We can know God better! Pr Phil gave 3 ways we can do that, jot down your thoughts and any Bible verses that could support these 3:

Observing Nature with an eye to finding God

Studying the Bible

Asking Him directly (prayer)

*Knowing God only comes through faith. God has left evidence for His existence everywhere, but it takes faith to see Him. Many wonder why God doesn't just show Himself and dispel any doubts, the Bible tells us that He will do that; which will prove the adage: be careful about what you ask!*

Prayer requests:
